

Addressing Unavoidable Non-Economic Losses to Climate-Induced Events for Communities in the Arctic

Research questions:

- What types of non-economic losses and damages can be expected in the Arctic?
- What non-economic losses and damages versus adaptation trade-offs are communities willing to make?
- How can we deliver the evidence required to articulate just responses to non-economic losses and damages?
- What types of responses to non-economic losses and damages do Arctic communities prefer?

Case Studies Across the Arctic Region
